## **REGISTERING YOUR VEHICLE IN A FOREIGN COUNTRY, ADD-ON ELECTRIC EQUIPMENT**

### **Registering Your Vehicle in A Foreign Country**

When planning to register your vehicle in a foreign country, before taking it there you should confirm whether it conforms to regulations in that country. Even if you successfully register the vehicle in a foreign country, you may still experience such problems as these in its actual use and should therefore consider the possibility of having to deal with them.

1. The fuel specified for your vehicle may be unavailable. If other than specified fuel is used, it could cause problems to the engine and other fuel-related parts.
2. Because vehicles like yours may not be marketed in the new country of registration, parts, servicing techniques, and tools necessary to maintain and repair your vehicle may be unavailable. Even if vehicles like yours are sold there, mechanical specifications required by the government may vary enough from the country of purchase to cause similar problems. Further, you may experience difficulty in getting after-sales servicing for any one of several reasons.

3. There may be no Authorized Xedos Dealer in the area in which you plan to register your vehicle.

We must therefore clearly state that when you leave the country in which you purchased your Xedos vehicle as a new vehicle and register it in another country, troubles arising from the use of fuel other than specified fuel are not subject to manufacturer's warranty.

Further, we cannot assume any responsibility for problems that result from unsatisfactory service or lack of service because of the reasons outlined above.

### **Add-on Electric Equipment**

The electric system of your Xedos vehicle is designed to perform under expected operation conditions. Before you install any additional electric equipment, consult an Authorized Xedos Dealer.

Improper installation of electrical equipment could cause fire. Some equipment or the way it's installed may affect the correct operation of your vehicle, including the engine, the driver information system, the audio system, and the electrical charging system.

We assume no responsibility for any expense you may incur or for any malfunctioning of your vehicle or any of its components or systems that may result from the installation of additional electric equipment that Xedos vehicle does not supply or approve for installation.

### **INSTALLATION OF A MOBILE TWO-WAY RADIO SYSTEM**

If a mobile two-way radio system is installed improperly or if an excessively powerful type of system is used, the fuel injection system, and other electronic systems may be affected. To avoid damage to your vehicle, consult an Authorized Xedos Dealer concerning the proper installation.
